ADMINISTRATIVE REPORT FOR THE FISCAL YEAR 1910.

MU

LETTER OF TRANSMITTAL.

DEPARTMENT OF THE INTERIOR, WEATHER BUREAU,
Manila, July 30, 1910.

SIR: I have the honor of transmitting herewith my annual report as Director of the Weather Bureau for the year ended on June 30, 1910. The very nature of this Bureau excludes happenings of transcendent importance, or even of absorbing interest. The ordinary course of events has, moreover, been very smooth during the year. Were it not for a few exceptions, the history of the Weather Bureau for the fiscal year 1910 might have been condensed into the three words "Everything as usual."

Very respectfully,

JOSÉ ALGUÉ, *Director*.

Hon. DEAN C. WORCESTER,
Secretary of the Interior, Manila, P. I.

ADMINISTRATIVE REPORT OF THE DIRECTOR OF THE WEATHER BUREAU FOR THE FISCAL YEAR 1910.

I. MANILA CENTRAL OBSERVATORY.

1. WORK OF THE CENTRAL OBSERVATORY.

As is to be expected, the work of the Central Office did not differ materially from that during preceding years. The increase of the personnel by one employee, suggested in last year's report and authorized by Act No. 1955, proved a great convenience, for, although no inspection trips were necessary, we were enabled to supply the places of several observers who were sick or on leave of absence. The office hours were the same as set forth in my last report, and the overtime put in by the employees of the Central Office amounted to 1,047 hours.

To the reports furnished hitherto to various Insular Bureaus has been added a monthly report on temperature and rainfall in agricultural districts, which is being sent to the Bureau of Agriculture for insertion in the Agricultural Review published by the said Bureau.

In addition to these regular reports, a considerable amount of astronomical data for Manila and other points of the Archipelago, which involved much calculation, has been furnished to United States officers and others, who were engaged in mapping and special investigations.

The following instruments have been compared: Barometers, 247 (chiefly for dealers); chronometers 27, as against 150 and 24, respectively, during the preceding fiscal year.

To the list of places to which telegraphic storm warnings are sent has been added the port of Tagudin, at the request of the lieutenant-governor of Amburayan.

With a view toward reducing telegraph tolls and following the example of the United States Weather Bureau, we no longer issue the daily weather note on Sundays and legal holidays, unless the weather conditions make it advisable to give a warning or reassurance.

The foreign cable correspondence remained unaltered during the year. Number of typhoon warnings sent to the various meteorological centers of the Far East, 106, an increase of 15 over last year's warnings. The greatest number (27) was sent during October, 1909, while none at all were required during January and February, 1910.

The 121 earthquakes felt in the Philippines during the fiscal year 1910 were divided among the seismic regions of the Islands as follows: 43 in the Batanes Islands, Luzon, and Mindoro; 29 in the Visayas; and 49 in Mindanao and the Sulu Archipelago. None of them was sufficiently intense to damage buildings, as the severest reached only VI of the scale of De Rossi-Forel. The period under consideration may be regarded as one of normal seismicity, since 121 is precisely the mean number of earthquakes per year resulting from the observations for the years 1902–1909.

In addition to the 121 earthquakes just mentioned, the seismographs of the Observatory registered 86 microseismic movements of local or very near origin; 49 near disturbances—that is, at distances of less than 1,000 kilometers; 59 which took place at distances between 1,000 and 5,000 kilometers; and 5 at distances exceeding 5,000 kilometers. The most important far-distant earthquakes recorded by our instruments were those in

Mexico, Beluchistan, and Greenland. Of several the epicenter is as yet unknown, except that it must have been in the Pacific Ocean. A number of photographic copies of the tracings made by our instruments during far distant earthquakes have been sent, upon request, to the central bureau of the International Earthquake Association and several observatories. In coöperation with the bureau just mentioned, an investigation of "seismic noises" in the Philippines has been undertaken, the result of which will in the near future be published in the Monthly Bulletin of the Weather Bureau.

2. IMPROVEMENTS.

Mr. Carson Taylor, publisher of the Manila Daily Bulletin, having offered to maintain and operate a miniature set of typhoon signals for the benefit of the vast number of people who pass through the Escolta, such signals were installed at the Bulletin Building, 42 Escolta. They were displayed for the first time on October 17, 1909, and are greatly appreciated by the public, as the signals hoisted at the semaphore station cannot be seen from most points of the city, and the location of the Bulletin Building is very central.

The following improvements of the Central Observatory have been made from private funds of the Observatory:

(*a*) A new sidereal clock by Riefler of Munich, at a total cost of ₱698.43. The purchase of this clock had been planned as early as 1905, when we acquired the more costly mean-time clock by the same maker and, consequently, a site for same had been provided in the case which shelters the latter.

(*b*) The new meteorological park. As the trees around the plot which formerly contained the thermometer shelter grew to considerable height and it was not desirable to sacrifice them, some being of special interest, the Observatory set aside a plot of 474 square meters in the northeast corner of the grounds, which is in every way more desirable than the former location. This plot was graded, a new shelter constructed, and the instruments mounted at an expense of about ₱185. As the old ground continues in use by the Weather Bureau for ground-temperature observations, etc., the latter has decidedly gained by the transaction, the time given by the mechanics being the only expense to the Bureau. Observations in the new park were commenced on January 1, 1910.

(*c*) But by far the most important improvement is the erection of a new magnetic observatory at Antipolo. As reported for the fiscal year 1905, the inauguration of the electric railroad in Manila ruined the magnetic observatory. Experiments were continued for about a year, but then the apparatus were dismounted and stored away. Several locations for a new observatory have at various times been considered, but none was found to be satisfactory. Baguio, Benguet, seemed the most desirable, but the uncertainty regarding the motive power of the future railway to the summer capital made us fear a repetition of our Manila experience, and the idea was abandoned. It having been finally decided to establish the institution at Antipolo, 18.5 kilometers east of Manila and about 215 meters above sea level, a tract of 25,590 square meters was purchased and upon it were erected two buildings of stone and wood. One of these, for housing the photographically registering variation instruments, measures 10 by 5 meters; the other, for absolute magnetic measurements, is 3 by 2 meters. The geographical coördinates of the new observatory are 121° 10′ east of Greenwich and 14° 35.8′ north. As the terminus of the electric railway from Manila to Fort William McKinley is at a distance of about 10 kilometers, no interference from stray currents need be feared. The distance from the railway station at Antipolo is only 500 meters, but no trace of vibration due to moving trains has been discovered. Unfortunately, the contractor failed to complete the buildings in time for the transit of Halley's comet, May 19, 1910; hence the instruments could be mounted only provisionally. Up to the present the total cost of the new magnetic observatory has been slightly more than ₱4,800 and some improvements are still needed.

As the routine work is very little and of such nature as not to require special training, it would be bad business policy to station an expert observer at ₱1,800 per year at Antipolo. Hence, a rain station has been established there, the observer in charge of which, in addition to taking the meteorological observations required of such stations, takes care of the lights and changes the sensitive paper of the registering instruments, for a salary of only ₱180 per annum. But as he also takes care of the buildings and grounds, this salary is supplemented by an equal amount paid from private funds. An expert visits the place twice a month, develops the papers, makes absolute observations, etc. The studying of the curves is done at the Central Observatory.

II. SECONDARY STATIONS.

1. MIRADOR OBSERVATORY.

By far the most important event with regard to the secondary stations was the opening of Mirador Observatory, Baguio, Benguet, on July 1, 1909. As a full description of this institution has been published (see IV, 2), I need only add that since the appearance of the latter, typhoon signals and a time ball have been added to the equipment of the observatory. By means of a special line from the Baguio telegraph office to Mount Mirador, the time signals are transmitted automatically from the clock of the Manila Observatory to Mirador Observatory. On July 9, 1909, these signals were received for the first time.

During the month of March, 1910, a second seismograph was installed. It was constructed by our mechanics, and though of the Vicentini type, it has an entirely new arrangement for the registration of the vertical component of seismic waves. The improvement is the idea of Rev. Miguel Saderra Masó, Assistant Director of the Weather Bureau, and gives better results than the horizontal spring pendulum employed for the same purpose by Professor Vicentini.

During the heated season the Weather Bureau had 5 employees at the summer capital, who naturally had their office at the observatory. In this connection I cannot refrain from mentioning Rev. José Coronas, Assistant Director of the Weather Bureau, who, although on leave of absence, of his own volition superintended the work of these employees and also erected the magnificent signal mast of 16.5 meters height, from which the time ball and typhoon signals are displayed. The former fell for the first time at noon of April 28, while the first occasion for hoisting the typhoon signals arose on May 6, 1910.

For the purpose of comparison between temperature and rainfall on the top of Mount Mirador and in the lower part of the city of Baguio, a shelter with the necessary thermometers and a rain gauge have been placed within the grounds of the Constabulary barracks, the commanding officer of which not only gave the necessary permission most courteously, but also issued orders to the guard for the protection of the instruments against unauthorized interference.

The stately building on Mount Mirador proved a great attraction during the Baguio season. On the basis of entries in the visitors' register—which arrived when the season was half over—It is etimated that more than 3,000 persons visited the observatory.

2. CHANGES IN STATIONS.

The second-class station at Olongapo, Zambales, was abolished on January 1, 1910. Owing to the transfer of the seat of the municipality of the same name to a barrio, the station would have occupied a position in which it would have been well-nigh useless. The third-class station at Tuburan, Cebu, has likewise been abolished, and the one at Tarlac reduced to rain station.

On the other hand, third-class stations have been established at Dumaguete (Oriental Negros), Santa Cruz (Laguna), and Iba (Zambales). The new magnetic observatory at Antipolo, as stated, is looked after by a rain observer.

The rain station on Cuyo Island has been raised to third-class, but even thus no observer could be found willing to go there until the month of May, 1910. The same reason necessitated the raising of the rain station on the Island of Yap, Western Carolines, to third class with the exceptional salary of ₱480 (instead of ₱360) per year.

3. STATIONS OF THE WEATHER BUREAU.

On June 30, 1910, the Weather Bureau maintained the following secondary stations, the numbers for the same date of the preceding year being given for the sake of comparison:

Class.	1910	1909
Branch observatory	1	0
First-class stations	7	7
Second-class stations	9	10
Third-class stations	25	23
Rain stations	10	9
Total	52	49

As regards volunteer stations, instruments have been furnished to the potato farm of the subsistence department, Department of Mindanao, Philippines Division, United States Army, and to Fort Mills, Corregidor Island. The instruments formerly in the hands of the military authorities at Malabang, Mindanao, have been transferred to the postmaster of the same place for observations in connection with the wireless telegraph station. Hence, there are at present 9 volunteer stations making observations for the Weather Bureau.

III. PERSONNEL.

1. NATIONALITY.

Of the total of 90 persons who were on the roster of the Weather Bureau on June 30, 1910, 81, or fully 90 per cent, were Filipinos, while the remaining 9 belonged to three different nationalities.

2. TRAINING OF OBSERVERS.

The arrangement for the training of prospective observers mentioned in previous reports has been continued and is of great advantage, especially as such applicants as fail in passing examinations and, hence, are not eligible for positions in the classified service, make far better third-class observers than men with no, or at best a hurried, training.

3. PECUNIARY PENALTIES.

The resorting to pecuniary penalties introduced during the preceding fiscal year appears to have had the desired effect of cautioning employees against neglect of duties. Aside from the two reductions mentioned further on, and which were due to lack of capacity more than to wilful neglect, only one fine of ₱3 has been imposed during the fiscal year 1910.

4. CHANGES IN THE PERSONNEL.

There were, all in all, 19 original appointments, of which, however, 8 were of a temporary character, and 17 separations.

(*a*) *Appointments.*—With one exception, all the appointments were to positions with salaries less than ₱600 per year. They were 1 assistant calculator, at ₱600; 4 third-class observers, at ₱360 each; 2 assistant observers, at ₱300; and 2, at ₱200 each; 2 rain observers, at ₱180 each; 3 temporary employees, at ₱360; and 5, at ₱300 each.

One position of draftsman (₱840) has been filled by transfer from the Bureau of Public Works, and two of third-class observers in places for which it is exceedingly difficult to obtain men, by the temporary employment of former observers.

(*b*) *Promotions.*—Only two real promotions occurred, viz, from assistant calculator at ₱600 per year to assistant observer at ₱960 and ₱1,200, respectively. Several employees have, however, received small raises in salary. The chief observer in charge of Mirador Observatory, from ₱1,200 to ₱1,440 per year; one temporary employee, a mechanic, from ₱60 per month to ₱80; another, likewise a mechanic, from ₱35 to ₱45 and finally to ₱60 per month; one temporary employee had his pay increased from ₱25 to ₱50 per month and three from ₱25 to ₱30.

Especially during the last six months there has been noticed among the employees considerable dissatisfaction with the low salaries prevailing throughout the Weather Bureau. Some of them are casting about for some more lucrative employment, and unless the Bureau is prepared to dispense with their services, it will be necessary to increase slightly some of the salaries, which, it may be safely affirmed, are considerably lower than those paid in every other Bureau for a similar class of work.

(*c*) *Reductions.*—One second-class observer (₱600) requested reduction to third-class observer (₱360), as his health was too poor to stand the amount of work required by his former position. Two third-class observers, having failed to profit by repeated admonitions, have been reduced to rain observers, as it was not feasible to replace them by more capable men.

(*d*) *Separations.*—The Weather Bureau lost one assistant observer at the Central Observatory, a very faithful employee, by transfer to the provincial service. He preferred a position at ₱600 per annum in Balanga, Bataan, to one of ₱1,200 in Manila, claiming that in his native town he could live more easily on half the salary than in Manila on the whole, with the benefit of a healthier climate thrown into the bargain.

By resignation: Second-class observers, 2; third-class observers, 3; temporary employee, 1. One of the second-class observers who resigned did so for the purpose of becoming a gubernatorial candidate and has been elected governor of Bohol Province; 1 of the third-class observers to become municipal president of Gubat, Sorsogon.

By discharge: One assistant observer.

By dismissal: One draftsman and 1 temporary employee.

IV. PUBLICATIONS.

1. ORDINARY PUBLICATIONS.

These consist of the Monthly Bulletin and the Annual Report.

(*a*) *The Monthly Bulletin of the Weather Bureau.*—Our efforts to bring up to date the Monthly Bulletin, as far as this is possible, have at last succeeded. Owing to the fact that a number of stations have poor postal facilities, copy cannot be ready for the printer until three months after the expiration of the month to which the given bulletin corresponds. If not crowded out by more important work, it may be expected to be printed within a month or six weeks. Thus the requisition for the printing of the Bulletin for January, 1910, bears the date April 30, but delivery was not made until June 29. On the other hand, the number for February was advanced as far as corrected page proofs on June 30, though the requisition is dated June 1. Copy for the Bulletin corresponding to March was forwarded to the printer on June 27. Beginning with the number for January, 1910, the edition of the Bulletin had to be increased from 1,000 to 1,100 in order to meet the demand.

(*b*) *The Annual Report of the Director of the Weather Bureau.*—Part II of the annual report for the year 1906 must be nearly ready for distribution, since the correction of the page proofs has been finished some time ago. Copy for the second part of the report for 1907 will be ready within three months, and for the first part of 1908 during the first days of August. Since the Bulletin is no longer farther behind time than is unavoidable, more attention and time can and will be devoted to the annual report.

2. SPECIAL PUBLICATIONS.

The following special publications have been printed during the fiscal year 1910:

(*a*) Mirador Observatory, Baguio, Benget, a new Meteorological-Geodynamic Station of the Weather Bureau. By Rev. José Algué, S. J., Director of the Weather Bureau. (Quarto, 11 pages, and 9 plates.) This is a description of Mirador Observatory, illustrated by 10 half-page and 3 full-page views. It likewise contains a "Summary report on climatic conditions" at the mountain resort.

(*b*) Catalogue of Violent and Destructive Earthquakes in the Philippines. With an Appendix: Earthquakes in the Marianas Islands. 1599–1907. By Rev. Miguel Saderra Masó, S. J., Assistant Director of the Weather Bureau. (Quarto, 27 pages, and 2 maps.) It is believed that this catalogue is as complete as a work of this kind can be made. Earthquake records for the period prior to 1800 are scarce and incomplete as to scientific details, because no special interest was taken in these phenomena; only the worst cases were recorded in the chronicles as public calamities. All the information obtainable has been embodied in the work mentioned.

(*c*) The Return of Halley's Comet and Popular Apprehensions. By Rev. George M. Zwack, S. J., secretary of the Weather Bureau. (Octavo, 22 pages.) This treatise was written with the intention of furnishing to educated people the material wherewith to combat the comet scare incidental to the approach of Halley's comet to the sun and earth in April and May, 1910, respectively. Though merely intended as a popular exposition of the groundlessness of comet scares in general and in the case of the recent return of Halley's comet in particular, the pamphlet has been well received in scientific circles.

V. FINANCIAL STATEMENT.

1. Appropriation for the Weather Bureau, fiscal year 1910, Act No. 1955		₱132,240.00
2. Receipts:		
Sale of instruments to Bureau of Public Works	₱26.54	
Sale of publications to Bureau of Education	50.11	
		76.65
3. Expenditures:		
(*a*) Current expense—		
Salaries and wages	₱74,927.24	
Printing and binding	19,249.37	
Telegrams and cablegrams	14,656.15	
Rent of offices and instruments	9,000.00	
Office supplies	2,339.81	
Transportation of persons and freight, per diems	1,954.29	
Postage on correspondence and publications	1,437.74	
Installations and repairs at secondary stations	954.72	
Miscellaneous expenses	573.62	
		125,092.94
(*b*) Extraordinary expense: None.		
(*c*) Permanent improvements: Purchase of equipment		2,779.92
Total expenditure		127,872.86

This total of ₱127,872.86 includes payments made on account of the fiscal year 1909 amounting to ₱410.10. Deducting this sum, we find that the total payments for the fiscal year 1910 have been ₱127,462.76. But to this sum must be added the following liabilities pertaining to the fiscal year just ended and remaining unpaid when the books were closed:

Unpaid liabilities:	
Current expense	₱1,841.22
Permanent improvements	331.19
Total	2,172.41

Nevertheless the total expenditures are well within the funds available, as is shown by the following figures:

4. Summary:		
Funds available—		
Appropriation, fiscal year 1910, Act No. 1955	₱132,240.00	
Receipts from sale of property	76.65	
		₱132,316.65
Expenditures—		
Disbursements	103,958.09	
Interbureau transactions	23,914.77	
Unpaid liabilities	2,172.41	
		130,045.27
Net balance		2,271.38

VI. MISCELLANEA.

1. THE BREAKDOWN OF THE SOUTHERN CABLES.

The efficiency of the weather forecast service was jeopardized to a considerable extent by the frequent interruptions of telegraphic communication with the south of the Archipelago. Surigao sent its last weather dispatch on November 30, 1908; Jolo had barely resumed communication by wireless telegraphy, after a year's isolation, when breaks in the cables cut off the whole of the southern islands from Manila, May 11, 1910. Only the first-class stations of Iloilo and Cebu can be reached via commercial cable, with an increase in cost of 66.7 per cent as far as the appropriation for the Weather Bureau is concerned, but of 166.7 per cent as regards the Insular Treasury, since formerly the cable tolls reverted to it through the Bureau of Posts.

2. HALLEY'S COMET.

A considerable amount of time has been devoted to this interesting object, but aside from 19 successful photographs, taken April 29 to June 10, nothing of importance has been ascertained. On May 19, the day of its transit across the sun, the solar disk was diligently watched by myself and Rev. Juan Comellas with the refractor of 48 centimeters aperture and a magnifying power of 200 during the hours from 9 a. m. to 12 noon Insular time, which is eight hours fast of Greenwich. A very slight haze diminished somewhat the transparency of the sky, and two or three times the passage of clouds interrupted the observations for a short while; but, on the whole, the state of the sky was quite satisfactory. Again and again the whole solar disk was examined very carefully from west to east; but with the exception of the sunspots and faculæ, which stood out clearly, nothing could be detected which might have led to the suspicion that an opaque body was passing in front of the sun—no shadow, not the slightest penumbra less brilliant than the rest of the sun, absolutely nothing could be seen.

As has been mentioned before, the instruments of the new magnetic observatory could be mounted only provisionally. Owing to trouble with the source of light, etc., the curves obtained May 18, 19, and 20 are not quite satisfactory, but they show clearly that there was a magnetic disturbance. The latter has been recorded in many places, but scientists do not agree as to its cause—its occurrence at the time of the comet's perigee may have been a mere coincidence. Copies of our records have been sent to the principal magnetic observatories.

3. CLOUD OBSERVATIONS AT BAGUIO, BENGUET.

The altitude of Mirador Observatory being 1,511.75 meters, it appeared desirable to make there a series of photographic cloud observations for the purpose of gathering further data concerning the higher air currents and their connection with thunderstorms and cyclones. I arrived at Baguio on May 24; on June 9 the preliminaries were finished, and from the following day until June 29 daily observations were made. The method was identical with the one employed in the international cloud measurements (June 1, 1896, to July 31, 1897) in which Manila Observatory took part. It consists in taking simultaneous photographs of a given point in a cloud by means of two exactly similar phototheodolites placed at the end points of a base line of known length. The readings of the horizontal and vertical circles of the instruments furnish the additional data required for calculating the height of the cloud above the station. The instruments and the whole process have been described in "Las Nubes en el Archipiélago Filipino," published by Manila Observatory in 1898. For the purpose of these measurements I had a pier constructed on a hill north of Mount Mirador, whose top was on the same level with that of the one already existing on the observatory grounds, which gave a base line of 698 meters. These observations will be continued as opportunity offers, and the results published in the Monthly Bulletin.

4. THE CENTRAL OBSERVATORY STRUCK BY LIGHTNING.

In concluding this report I beg to mention an accident which might have had serious results. At 4.35 p. m. of July 21, 1909, the general office at the Observatory was full of employees who were preparing to leave at the close of the office hours, when the tower in which the said office is located was struck by lightning. The discharge evidently missed the lightning rod on top of the time-ball mast and probably struck one of the anemometers. The telegraph line and the wire for the time ball on Engineer Island were broken, all the instruments mounted on the central pier had their electric circuits burned out, and a mercury contact on one of the side pillars its mercury scattered. But happily nobody was hurt in the least, nor was there any damage done to the building. In fact, we were unable to ascertain the real path of the stroke.

PART II.

HOURLY METEOROLOGICAL OBSERVATIONS MADE AT THE CENTRAL OBSERVATORY DURING THE CALENDAR YEAR 1910.

LETTER OF TRANSMITTAL.

DEPARTMENT OF THE INTERIOR, WEATHER BUREAU,
Manila, March 15, 1913.

SIR: I have the honor of transmitting herewith Part II of the Meteorological Report of the Weather Bureau for the year 1910. The same contains the hourly observations made at the Central Observatory during the calendar year 1910.

Very respectfully,

JOSÉ ALGUÉ, *Director.*

Hon. DEAN C. WORCESTER,
Secretary of the Interior, Manila, P. I.

INTRODUCTION.

Part II of our report for 1910 contains the meteorological observations made during the year at the Central Observatory at Manila. The hours of observations are given in Insular standard time; that is, in the time of the one hundred and twentieth meridian east of Greenwich, adopted by order of the United States Government on September 6, 1899. It is to be noted that the observations of atmospheric pressure, temperature, relative humidity, vapor tension, and the direction and force of the wind are hourly, read directly between the hours 6 a. m. and 7 p. m., while for the hours from 8 p. m. to 5 a. m. they are taken from self-registering apparatus. The hourly observations of the direction, form, and amount of clouds are made from 7 a. m. until 6 p. m. only. Each of the tables of hourly observations shows also the respective hourly, daily, and monthly means. The extreme daily values of the various elements, together with the times of their occurrence, are united into a separate table. The thermometers and atmidometer are placed in the Observatory park, 1.5 meters above the ground.

The readings of the barometer have not been corrected for gravity; this correction would be —1.72 mm.

All observations contained in this report are expressed in the metric system, continuing the practice adopted at the time of the reorganization of the Weather Bureau. As in former reports, we have arranged the observations according to month.

EXPLANATION OF SYMBOLS (BEAUFORT'S LETTERS AND INTERNATIONAL WEATHER SYMBOLS).

Symbol.	Equal to—	Symbol.	Equal to—
Ci.	Cirrus.	o	Overcast.
Ci.-S.	Cirro-stratus.	p	Passing showers of rain.
Ci.-Cu.	Cirro-cumulus.	q	Squally.
A.-Cu.	Alto-cumulus.	u	Ugly or threatening weather.
A.-S.	Alto-stratus.	v	Visibility of distant objects.
S.-Cu.	Strato-cumulus.	w	Wet or heavy dew.
N.	Nimbus.	●	Rain.
Cu.	Cumulus.	≡	Fog or mist.
Cu.-N.	Cumulo-nimbus.	⌓	Dew.
S.	Stratus.	⊕	Solar corona.
Fr.-Cu.	Fracto-cumulus.	○	Solar halo.
Fr.N.	Fracto-nimbus.	⊍	Lunar corona.
Fr.-S.	Fracto-stratus.	∪	Lunar halo.
S.-cf.	Stratus-cumuliformis.	↯	Lightning.
N.-cf.	Nimbus-cumuliformis.	☈	Thunderstorm.
M.-Cu.	Mammato-cumulus.	T	Thunder.
b	Clear, blue sky.	↙	Strong wind.
c	Partial clouds.	⌒	Rainbow.
d	Drizzling or light rain.	∞	Dust haze.
g	Gloomy, or dark, stormy-looking weather.		

NOTE.—The intensity of any individual phenomenon may be distinguished by the figures of ° and ², which should be used as exponents of the symbols, so that ° indicates slight, and ² strong; e. g., $●^{\circ}$=slight rain, $●^{2}$=heavy rain. Figures in heavier type represent extreme values.

OBSERVATIONS FOR JANUARY, 1910.

DAILY GENERAL REMARKS.

1----≡° a.; gusty NEly. winds in the forenoon and afternoon.
2----As yesterday.
3----Somewhat gusty NEly. winds in the afternoon.
4----≡° a.; gusty NNE winds in the afternoon.
5----≡°, d in the morning; ●°, somewhat gusty NNE winds in the afternoon.
6----≡° a.; p in the afternoon.
7----≡° a.; d° in the afternoon.
8----≡° a.
9----≡° a.
10----d in the morning.
11----● in the morning; ●° in the afternoon.
12----≡ a.; p 12. 50 p.
13----⌓, ≡°, d° in the morning; ●° in the afternoon.
14----≡° a.
15----≡° a.; somewhat gusty SE winds in the afternoon.
16----≡ a.; somewhat gusty SEly. winds in the afternoon; coloration of clouds at sunset.
17----≡° a.
18----≡° a.
19----≡°, d° in the morning; ⌒^{2} p.
20----⌓, ≡° a.; somewhat gusty SEly. winds in the afternoon.
21----≡° a.
22----≡° a.
23----≡° a.
24----≡° a. somewhat gusty ESE winds in the afternoon; coloration of clouds at sunset.
25----Somewhat gusty SEly. winds during the warmer hours.
26----Coloration of upper clouds at sunset.
27----≡° a.; somewhat gusty SE winds during the afternoon.
28----≡° a.; striking coloration of clouds at sunset.

DAILY GENERAL REMARKS.

1----≡° a.; gusty SE winds in the afternoon.
2----As yesterday.
3----Somewhat gusty WSW winds in the afternoon.
4----≡° a.; ● in the afternoon, coloration of clouds at sunset.
5----≡° a.; [< E quad. in the afternoon.
6----≡ a.; p in the afternoon.
7----≡ a.
8----≡ a.; ≡° p.
9----≡ a.; d° in the morning and afternoon.
10----≡° a.; < NW quad. in the evening.
11----≡a.; d° in the afternoon; coloration of clouds at sunset.
12----≡ a.; ● in the afternoon.
13----≡°, d° in the morning; ●°, gusty E winds in the afternoon.
14----≡ a.; somewhat gusty ESE winds during the warmer hours.
15----≡, d° in the morning; somewhat gusty NEly winds in the afternoon.
16----≡°; convergence of Ci. toward S in the morning; coloration of clouds at sunset.
17----d° in the morning; somewhat gusty Nly winds in the forenoon and afternoon.
18----≡° a.; somewhat gusty SW winds during the afternoon; intense coloration of clouds at sunset.
19----≡° a.
20----≡° a.; ⊤ S quad. and E, ⌒ in the afternoon; ●° in the evening.
21----≡° a.; gusty NW and N winds, d in the afternoon; coloration of clouds at sunset.
22----≡° a.; p° 11.35a.; [<° SW quad. and NNW in the afternoon.
23----p°, [< various points in the afternoon; < different points in the evening.
24----Ω^{2}, ≡ a.
25----Gusty SEly winds in the forenoon and afternoon.
26----Somewhat gusty ESE winds in the afternoon.
27----≡a.; somewhat gusty Ely winds in the forenoon and afternoon.
28----≡°, d° in the morning; somewhat gusty Ely winds in the afternoon.
29----≡° a.; gusty SE winds in the afternoon.
30----≡° a.; < SE in the evening.
31----≡° a.; <° SE in the evening.

DAILY GENERAL REMARKS.

1----≡° a.; gusty SE winds in the afternoon.
2----Somewhat gusty ESE winds in the evening.
3----≡° a.; d° somewhat gusty NNE winds in the afternoon.
4----≡° a.; p° at noon; coloration of clouds at sunset.
5----d in the afternoon.
6----d° in the afternoon.
7----≡° a. p.; somewhat gusty E winds in the afternoon.
8----≡° a. p.; somewhat gusty SEly winds in the afternoon.
9----≡° a.; gusty SE winds in the afternoon.
10----≡° a.
11----Gusty SE winds, T° NNE in the afternoon; <° NNW in the evening.
12----Gusty SEly winds in the afternoon; <° NNW and N in the evening.
13----Gusty SEly winds in the afternoon.
14----≡° a.; gusty SEly winds in the afternoon.
15----≡° a.; <° NW and SE in the evening.
16----≡° a. p.
17----≡° a.
18----≡° a.; gusty WSW winds in the afternoon; ● at night.
19----≡° a.; ⊕ p.; ⌈<° NE, ⌈< SSE, < N and E in the evening.
20----≡°, d° in the morning; ⌈<° E, ⌈< N in the afternoon.
21----≡° a.; ⌈<° NE quad.; ○° in the afternoon.
22----≡° a.; p^2, convergence of Ci. toward N in the afternoon; ⌣, <° WSW in the evening.
23----≡°, convergence of Ci. toward SSW in the morning; ●, ⌈< NW in the afternoon; <° W quad. in the evening.
24----● almost all day long; ●^{2} in the evening.
25----● in the early morning; frequent d in the morning and afternoon.
26----⌓ a.; gusty SE winds, d°, ⌈< various points in the afternoon.
27----⌈<° NE, N and S in the afternoon.
28----⌓°, ≡° a.; gusty SE winds in the afternoon.
29----⌈< NE in the afternoon.
30----⌓ a.; <° NNW in the evening.

DAILY GENERAL REMARKS.

1----≡°, convergence of Ci. toward WSW early in the morning; d° in the afternoon.

2----≡, somewhat gusty WNW winds in the morning; T°NE, d° in the afternoon.

3----[< NE quad. in the afternoon.

4----⌓ a.; ●°, ⌒ in the afternoon; coloration of clouds at sunset.

5----≡ a.; coloration of upper clouds at sunset; <° NW in the evening.

6----≡° a.; gusty SWly winds during the afternoon; intense coloration of upper clouds at sunset; [< NE quad. in the evening.

7----Gusty SW and WSW winds at intervals; [< NE quad. in the afternoon.

8----≡ a.; somewhat gusty WSW winds in the forenoon and afternoon, ◯ p.; intense coloration of clouds at sunset.

9----Cirrus extended from SSE to NNW in the afternoon.

10----⌓ a.

11----≡°, ⌓, p in the morning.

12----≡ a.; [< NE in the evening.

13----≡°, [<° NE 3.30p.; <° N in the evening.

14----⌓ a.; [< NE quad. in the afternoon.

15----≡°, ⌒², ●° in the morning; < NE quad. in the evening; ● at night.

16----● in the early morning; [<° E quad. in the evening.

17----⌓ a.; somewhat gusty WSW winds in the evening.

18----●² in the early morning; ≡ a.; [<° N quad.; convergence of Ci. toward NE in the evening.

19----⌓, ≡ a.; convergence of Ci. toward S in the afternoon; ● at night.

20----[< NE quad., ● in the morning; [<° SE and ENE in the afternoon; ⌒, <° NNW, ● in the evening.

21----⌓, ≡°, ◯° a.; [< various points in the afternoon.

22----≡° a.; [< E and S quad., p° in the afternoon; ● at night.

23----⌓ a.; thundershowers in the afternoon; [< NE in the evening.

24----● in the early morning, in the forenoon and night; ≡°, ◯° a., [<° NE and SE quad. during the afternoon.

25----≡ a.; frequent ● and d; somewhat gusty Sly winds in the afternoon.

26----Rainy weather with gusty SWly winds, especially in the early morning.

27----Frequent ●, especially in the morning and at night; ⌒ p.

28----Rainy weather; ≡, ⌒°, [< W, gusty WNW winds in the morning; [< NE quad. in the afternoon.

29----≡°, T° W, ◯ in the morning; ● in the afternoon.

30----≡ a.; ⌒°, [< various points, ● in the afternoon.

31----≡° a.; ●°, T S and NE quad. in the afternoon.

DAILY GENERAL REMARKS.

1----● a. p.; [<° NW and NE quad. in the afternoon.
2----≡° a.; ● p.
3----≡° ○° a.; d, gusty WSW winds in the afternoon; [< NE quad. in the evening.
4----≡° a.; [< SSE, ⊤° E, d in the afternoon; < NE in the evening.
5----● in the early morning; ≡° a.; [<° S quad. in the afternoon.
6----≡° a.; [< NE quad. in the afternoon.
7----≡° a.; heavy thundershowers at night.
8----≡° a.; [< N quad. in the evening.
9----≡° a.; gusty WSW winds during the afternoon and evening.
10----●° a.; somewhat gusty WSW winds at intervals; coloration of clouds at sunset
11----≡° a.; somewhat gusty SWly. winds in the afternoon.
12----≡° a.; ○^{2} a. p.; somewhat gusty WSW winds in the evening; ●° at night.
13----d°, convergence of Ci. toward NNE in the morning; d° ⊤° NW quad., somewhat gusty SWly. winds in the afternoon; [<° N quad., intense coloration of clouds in the evening.
14----≡°, convergence of Ci. toward E in the morning; p, gusty WSW winds in the forenoon and afternoon; [< N quad. in the afternoon; ● at night.
15----≡, d° in the morning; ● in the afternoon.
16----≡° a.; rainy weather especially in the afternoon; gusty Wly. winds in the forenoon and afternoon.
17----○ a.; ● during the morning and afternoon; convergence of Ci. toward NNE in the afternoon; ω in the evening.
18----≡° a.; ○ a. p.; coloration of upper clouds at sunset.
19----≡° a.; d°, [<° NE quad. in the afternoon.
20----≡°, ● in the morning.
21----≡° a.; ○ a. p.; p° in the afternoon.
22----≡° a.; ●, [< SE quad. in the afternoon; intense coloration of clouds at sunset.
23----≡° a.
24----≡, ⏜ a.; ⊤ NE quad. in the afternoon; < NNW in the evening.
25----≡ a.; < NNW in the evening.
26----≡° a.; coloration of clouds at sunset; ● at night.
27----≡° a.; coloration of upper clouds at sunset.
28----≡° a.; convergence of Ci. toward ESE in the afternoon, coloration of clouds, [<° E quad. in the evening.
29----≡° a.; coloration of clouds at sunset.
30----≡° a.; p° in the morning; d at night.
31----●^{2} in the early morning; ≡° a.; gusty WSW winds, < N quad. in the evening.

DAILY GENERAL REMARKS.

1----≡°, ● in the morning; ○ a. p.
2----≡° a.; d°, gusty WSW winds in the afternoon.
3----≡°, ● a.; T° S in the afternoon; ⌒², d°, gusty WSW winds in the evening.
4----≡°, ●° in the morning; ●, ⚡ various points at night.
5----≡°, d°, ⚡° S quad. in the morning; ⚡ NE quad, TS. in the afternoon; ϟ NNW in the evening.
6----≡°, ●, ⌒² early in the morning; ⚡° S quad. in the afternoon; ϟ² N in the evening.
7----∞°, ⌒ in the morning; ⚡ N quad., somewhat gusty WSW winds in the afternoon; ●° at night.
8----≡° a.; gusty WSW winds in the afternoon; ϟ N in the evening.
9----●² a.; gusty SWly. winds, ○, ● p.
10----≡°, ● in the early morning; ○ a.; d° in the afternoon.
11----≡°, convergence of Ci. toward NE in the morning; gusty WSW winds in the afternoon; ● at night.
12----≡°, d early in the morning; ●, ⚡° NW quad. in the afternoon.
13----⚡°, d, ⌒° early in the morning; T° W, ●² in the morning; somewhat gusty WSW winds in the afternoon.
14----●, ○ in the morning; somewhat gusty SWly. winds in the afternoon; ϟ N in the evening.
15----⌓, ≡° a.; gusty SWly winds in the afternoon.
16----●, ≡° early in the morning; somewhat gusty SWly. winds in the afternoon; ϟ NW quad. in the evening.
17----≡° a.; ● in the early morning and night; ⚡ N quad., coloration of clouds in the evening.
18----≡° a.
19----≡° a.; ⚡° E quad., d° in the afternoon; coloration of clouds at sunset.
20----≡° a.; light thundershowers in the afternoon; ϟ N in the evening; ⋓° p.
21----● in the morning, and afternoon; T NE quad. in the afternoon.
22----≡°, d in the morning; T W quad., p° in the afternoon; ϟ E quad. in the evening.
23----≡° a; ⚡ NE and S quad., ● in the afternoon; intense coloration of clouds at sunset; ⚡² N quad., ● at night.
24----Rainy weather, with somewhat gusty WSW winds in the afternoon.
25----≡°, ○, convergence of Ci. toward NE in the morning; ⚡ E quad. in the afternoon; ϟ in the evening.
26----≡° a.; coloration of upper clouds at sunset.
27----≡°, ○ a.; convergence of Ci. toward NNE in the afternoon.
28----⌓°, ≡° a.; ○°, convergence of Ci. toward NNW in the morning and afternoon; somewhat gusty WSW winds in the afternoon.
29----d°, convergence of Ci. toward N in the morning; gusty WSW winds in the afternoon; ● at night.
30----Frequent rain, especially in the afternoon, with gusty wind.
31----≡ a.; some rain with gusty WSW winds in the morning and afternoon.

DAILY GENERAL REMARKS.

1----≡° a.; somewhat gusty WSW winds in the afternoon.
2----● in the morning, and especially in the afternoon, with gusty WSW winds.
3----● in the morning and night, and gusty SWly. winds at intervals.
4----Rainy weather, especially in the afternoon; T° NW 12.50 p. m.
5----Frequent rain or drizzle with some gusty SWly. winds.
6----≡° a.; almost continuous rain or drizzle; gusty SWly. winds at night.
7----≡° a.; gusty SW winds in the evening; ● at night.
8----≡° a., convergence of cirrus toward NW in the morning; ⛈° NE and ⛈ NW quad. in the afternoon; thundershowers at night.
9----≡° a; d°, ⛈ NE quad. in the afternoon; ⛈ SW quad., ϟ various points in the evening; ●² at night.
10----≡° a; d at noon; slight coloration of clouds at sunset.
11----≡° a.
12----≡° a.
13----≡° a; light thundershowers in the afternoon.
14----≡°, ● a.
15----Continuous d in the morning.
16----≡ a.; thundershowers in the afternoon; ●° at night.
17----≡°, ⌓ a.; T E in the afternoon; ● in the evening.
18----≡° a; ⛈ NE and S quad. in the afternoon; thundershowers in the evening.
19----d° in the morning; ⛈° SSE, ● in the afternoon.
20----≡° a.; ● in the early morning and afternoon.
21----≡° a.; ⛈ W in the afternoon; ●² in the afternoon and night; intense coloration of upper clouds at sunset.
22----≡° a; ⛈° W quad. in the afternoon; ϟ SW and NW in the evening; ● at night.
23----≡° a.; light convergence of cirrus toward ESE in the morning; ⛈ NNW, p° in the evening.
24----≡°, ⌓ early in the morning; gusty Wly. winds and d in the afternoon and night.
25----≡°, ●² in the early morning; coloration of clouds at sunrise; ⛈ NE quad. in the afternoon; ϟ NNW in the evening.
26----● early in the morning; d, ⛈ NNE in the afternoon; heavy thundershowers in the evening.
27----≡° a.; ⌒, gusty SWly. winds in the afternoon; d° in the evening; ● at night.
28----⌒° in the morning; frequent rain, especially in the afternoon, with gusty SWly. winds.
29----Almost continuous rain or drizzle.
30----d° in the afternoon; rain in the evening.

DAILY GENERAL REMARKS.

1----≡°, d in the morning; < NE in the evening; ● at night.
2----● in the early morning and afternoon.
3----≡ a.; ● in the forenoon and during the afternoon and night.
4----≡° a; d° in the morning and afternoon.
5----≡, ●° in the early morning; < N quad. in the evening.
6----≡° a; ⌒ in the afternoon; coloration of upper clouds, [< N quad. in the evening; ● at night.
7----≡ a; thundershowers in the afternoon; < various points in the evening.
8----≡^{2}, ⌓ a.; T° NE, ●° in the afternoon.
9----d°, ○, in the morning; [<° NNE in the afternon; ●° in the afternoon and night.
10----Thundershowers in the afternoon; ● at night.
11----≡ a; thundershowers in the afternoon.
12----≡° a; ● in the forenoon and afternoon; [< NE in the afternoon.
13----≡ a; coloration of upper clouds at sunrise; T° SE and NW quad. in the afternoon; ● in the afternoon and night.
14----≡° a; ●^{2} in the afternoon.
15----⌓, ≡° a; < N quad. in the evening.
16----≡° a; [<° NE quad., T° W in the afternoon; ●°, < NNW in the evening.
17----≡ a; ● in the afternoon; < NNW in the evening.
18----≡° a.
19----≡° a.
20----≡° a; ● in the afternoon.
21----≡ a; thundershowers in the afternoon; coloration of clouds at sunset.
22----≡° a; d° in the morning and afternoon; [<° E in the afternoon.
23----≡, ⌓°, ● in the morning.
24----≡° a.
25----≡ a; ● in the afternoon.
26----≡° a; d° in the afternoon.
27----≡° a; p° in the afternoon.
28----≡° a; coloration of clouds at sunset.
29----≡, d° in the morning.
30----Somewhat gusty NEly winds in the morning and afternoon.
31----d° in the forenoon; somewhat gusty NNE winds in the forenoon and afternoon; coloration of upper clouds at sunset; [<° E at night.

DAILY GENERAL REMARKS.

1----⌒° a; d a. p.
2----● at night.
3----≡^{2} a.
4----d, ● in the morning.
5----≡°, ●° in the morning.
6----○° a; p° 2.50 p.
7----≡° a; coloration of lower clouds at sunset.
8----≡° a.
9----≡° a; [< SE, < NW quad., ● in the evening.
10----[< NE quad. in the afternoon; slight thundershowers in the evening.
11----[<° E and NW quad., p in the evening.
12----Some rain in the morning; d in the afternoon.
13----Somewhat gusty NNW winds in the morning; ● at night.
14----Frequent rain or drizzle, especially in the early morning with somewhat gusty NNW winds veering to ESE.
15----Somewhat gusty ESE winds at noon.
16----≡° a; ● at night.
17----●, d in the morning and afternoon.
18----⌒ a; ●^{2} in the early morning; ● in the forenoon and afternoon; [< S 3.20 p.
19----● a; d° 2 p.
20----≡ a; d, ● p.
21----≡° a; d in the early morning; coloration of clouds at sunset.
22----≡ a; ● in the morning and afternoon; somewhat gusty NWly winds in the afternoon and evening.
23----d at night.
24----d in the early morning; convergence of cirrus toward E in the morning; [< N in the afternoon.
25----≡° a.
26----≡° a; ●° in the afternoon.
27----≡, d in the morning.
28----≡° a; ●° in the afternoon.
29----≡° a; ● in the forenoon; intense coloration of clouds at sunset.
30----≡^{2}, ● in the morning.

DAILY GENERAL REMARKS.

1----Cloudy weather.
2----d in the morning; ● in the afternoon and evening.
3----● in the early morning, afternoon and evening.
4----Somewhat gusty ESE winds at noon; d in the afternoon; ● at night.
5----d° in the early morning; ≡° a. p.
6----Cloudy weather.
7----≡° a., d in the afternoon.
8----⌓, ≡ a.; ≡° p.
9----≡, ⌓² convergence of cirrus toward E in the morning.
10----≡° a.; d° in the afternoon.
11----Cloudy weather.
12----●° in the afternoon.
13----≡° a.; ●°, ⌒ in the afternoon.
14----≡° a.; p° 12.45 p.
15----Overcast.
16----≡° a.; d° at night.
17----≡°; d° in the early morning.
18----≡° a.
19----≡° a.; somewhat gusty E winds in the afternoon.
20----≡° a. p.; coloration of clouds at sunset.
21----≡° a.; coloration of clouds at sunset; ●° at night.
22----≡° a.; d° in the morning and afternoon.
23----Somewhat gusty NNE winds in the afternoon.
24----≡° p.
25----≡° p.; p°, ⌒ in the afternoon.
26----≡° a.; d° in the afternoon.
27----≡° a.; ● p.
28----Rainy in the morning and afternoon.
29----≡ a. p.; somewhat gusty ESE winds in the afternoon.
30----≡°, slight coloration of upper clouds at sunrise.
31----≡° a.; Ci.-S. extended from NNW to SSE in the afternoon.

LETTER OF TRANSMITTAL.

DEPARTMENT OF THE INTERIOR, WEATHER BUREAU,
Manila, June 30, 1913.

SIR: I have the honor to submit the Annual Report for 1910, Part III, containing meteorological observations of the secondary stations during 1910.

JOSÉ ALGUÉ, *Director.*

Hon. DEAN C. WORCESTER,
Secretary of the Interior, Manila, P. I.

INTRODUCTION.

In this volume (Part III) of the report of the Director of the Weather Bureau for 1910 we publish the meteorological observations made in the various stations which at present constitute the meteorological service of the Philippines, a service established by Act No. 131 of the Philippine Commission May 22, 1901.

In Part II of the report for 1902, pages 52 to 60, will be found a detailed account of the establishment and organization of these branch stations and a list of the instruments with which they are equipped, according to their class.

The reports of the various observers are carefully collated and examined at the Central Observatory, but it is evident that the Directors cannot assume the full responsibility for the accuracy of these observations. As every meteorologist knows, in observations of this kind much must be left to the conscientious care of the observer. Hence, while we take this opportunity to express our confidence in our observers, we think it proper to subjoin the following list, which gives some particulars about the stations and also the names of the observers who are primarily responsible for the accuracy of the observations published in this volume (Part III) of the Annual Report of the Weather Bureau.

REMARKS.

The hours of observation at the first and second class stations are 2 a. m., 6 a. m., 10 a. m., 2 p. m., 6 p. m., 10 p. m.; at the third and fourth class stations, 6 a. m. and 2 p. m. The time used is that of the one hundred and twentieth meridian east of Greenwich.

The barometer readings are reduced to sea level and 0°C., but no correction has been applied to eliminate the effect of gravity depending on the latitude of the place of observation.
